

Refraction Services and Fees

A refraction is the process of determining your best corrected vision and if there is a need for corrective eyeglasses or contact lenses. It is an essential part of the eye exam and is necessary to write a prescription for glasses or contact lenses. This is a separate, billable code per insurance companies.

A refraction is **NOT** a covered service by Medicare or most medical insurance plans. These plans consider a refraction a “vision” service not a “medical” service.

We will **NOT** file the charge for a refraction with a health insurance unless you know that your plan covers the refraction charge.

Our office fee for a refraction is **\$45.00** at the time of service in addition to any co-payment your plan may require.
